

Jet Grouting

The course provides specific knowledge about the technology and related application fields.

Course topics

General topics:

- Soil & rock classification and characteristics
- Technologies and Geotechnical application fields
- Drilling techniques
- Safety about the technology
- Jobsite layout, equipment & ancillaries
- Environmental management
- European standards EN 12716
- Acquisition and use of electronic processing parameters (DMS, DPS, APS)
- Case histories

Specific topics:

- Processing stages and grouting
- Technology variants
- Advantages and limitations
- Materials and execution controls
- Test field, process and product tests

Extra Technology Packs (on demand):

- Tunnels technologies
- Injections
- Deep Soil Mixing

Duration

4 days

Languages

**English, Italian
or any other language upon
client's request**

Location

**Cesena (FC) - Italy
or any customer's site**

Audience

**Site managers;
Field engineers;
Foremen;
Rig supervisors.**

Prerequisites

**Experience in engineering
foundation sector preferred
but not essential**

Learning objectives

**To develop a technical and
working knowledge of the
drilling techniques and related
technology;**

**To analyze the jobsite layout
and the equipment;**

**To enhance the knowledge of
construction phases and field
applications;**

**To know how to manage
safety, quality and environment
for the technology;**

**To acquire knowledge for
troubleshooting.**
